EDUCATION

Veer Surendra Sai University of Technology, Burla

Bachelor of Technology (B.Tech) in Information Technology - CGPA - 9.36

08.2023 – Ongoing

Burla, Sambalpur, Odisha

- **Relevant Coursework:** Data Structures and Algorithms, Computer Networks, Operating Systems, Database Management System, Object Oriented Programming, Software Engineering

EXPERIENCE

Software Engineering Program Intern - JPMorgan Chase & Co.

18.05.2026 – 10.07.2026

Consumer & Community Banking (Wealth Management)

Bengaluru, India

- Designed and implemented a **retry-replay mechanism** with DB-based transaction status tracking to auto-recover failed asset transfers on a production system used across asset transfer flows, working in an **Agile/Scrum** team with sprint planning and daily stand-ups.
- Built **Splunk dashboards** across 2 Java/Spring Boot microservices for error monitoring, configured **Control-M** batch scheduling within a Spring Boot architecture on private cloud with **Jenkins CI/CD**, and contributed to the team's **AI-assisted developer tooling** efforts.

Backend Development Intern - GramIQ

23.06.2025 – 30.09.2025

Remote

- Engineered **21+ RESTful APIs** for a multi-admin dashboard with role-based authentication and hierarchical access control using **Node.js** and **Express.js**, and designed the database schema with **Prisma ORM**.
- Integrated **Redis caching** for session management and deployed secure invitation workflows to improve API response times under concurrent access.

PROJECTS

TnP Placement Portal

- Built a full-stack placement management platform for VSSUT's Training & Placement Cell using **TypeScript**, **Express**, **Prisma**, and **PostgreSQL**, solving the problem of manual, error-prone spreadsheet and PDF-based tracking with a centralized system for student, company, and application data.
- Developed an admin panel with **React 19**, Shadcn UI, and **Zustand**, integrating **AWS S3** for document storage and **JWT/Zod**-secured APIs, giving students, TnP staff, and companies a single convenient interface instead of disconnected manual processes.

URL Shortener Web Application

- Designed a scalable full-stack URL shortener using the **MERN stack**, applying system design principles for a read-heavy workload: **collision-free short-code generation**, indexed lookups for fast redirects, and **JWT**-based authentication with HTTP-only cookies for secure sessions.
- Built a click-analytics dashboard with **Redux** state management and **TanStack Router**, following best practices like input validation and optimized API calls for a maintainable, production-style codebase.

SKILLS

- **Languages:** Java, JavaScript, TypeScript, C, C++, Python, SQL
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Redux, Zustand, Tailwind CSS
- **Databases & ORM:** PostgreSQL, MongoDB, Prisma ORM
- **Cloud & DevOps:** AWS, Docker, Jenkins, Git, GitHub, Vercel
- **Tools:** Postman, VS Code, JWT, Zod

ACHIEVEMENTS & LEADERSHIP

- **JPMC Code For Good Hackathon:** Led a team of 7 to **1st position** among **60,000+ applicants** at J.P.Morgan Chase's hackathon.
- **Google Developer Groups on Campus - Organizer:** Planned and executed major tech events and hackathons for the campus community as a lead.
- **AWS Cloud Club - Core Team Member:** Organized cloud-focused technical sessions and events on campus.
- **Enigma, VSSUT - Team Member:** Designed and built the official college fest and other club related website.
